

Workshop at ISO 27001, Croke Park, April 26th 2017:

Tackling your biggest IT Security Risk – Employee Behaviour

Time: 11.00am to 12.30pm

Workshop Background

This interactive workshop will 1) explore key Information security and governance challenges facing Information Security Managers in corporate environments today particularly in relation to employee behaviours, 2) provide participants with a forum to share their own experiences and approaches and and 3) share insights on how others have address this key area of risk management.

The workshop is facilitated by **Central Solutions Ltd.**

Participants in this training workshop are free but limited and on a first come first served basis. Attendees need to register **in advance** by email to rjoyce@central-solutions.com no later than **20th of April.**

Learning Outcomes

Having successfully completed the workshop the participant will have:

- Gained insights into key behavior-related Information Security management and governance challenges in corporate environments
- Considered the people, process and technology aspects of addressing these challenges in a systematic way
- Gained a greater understanding of staff compliance training approaches, strengths and weaknesses
- Reflected on their organisation's IT Security Behavioural Maturity Model and approach, where they are and how to get to the next targeted level.
